CS 575 Lab Notebook

Lab 4

Name: Jarren Calizo
OdinID: calizo
Date: January 31, 2026

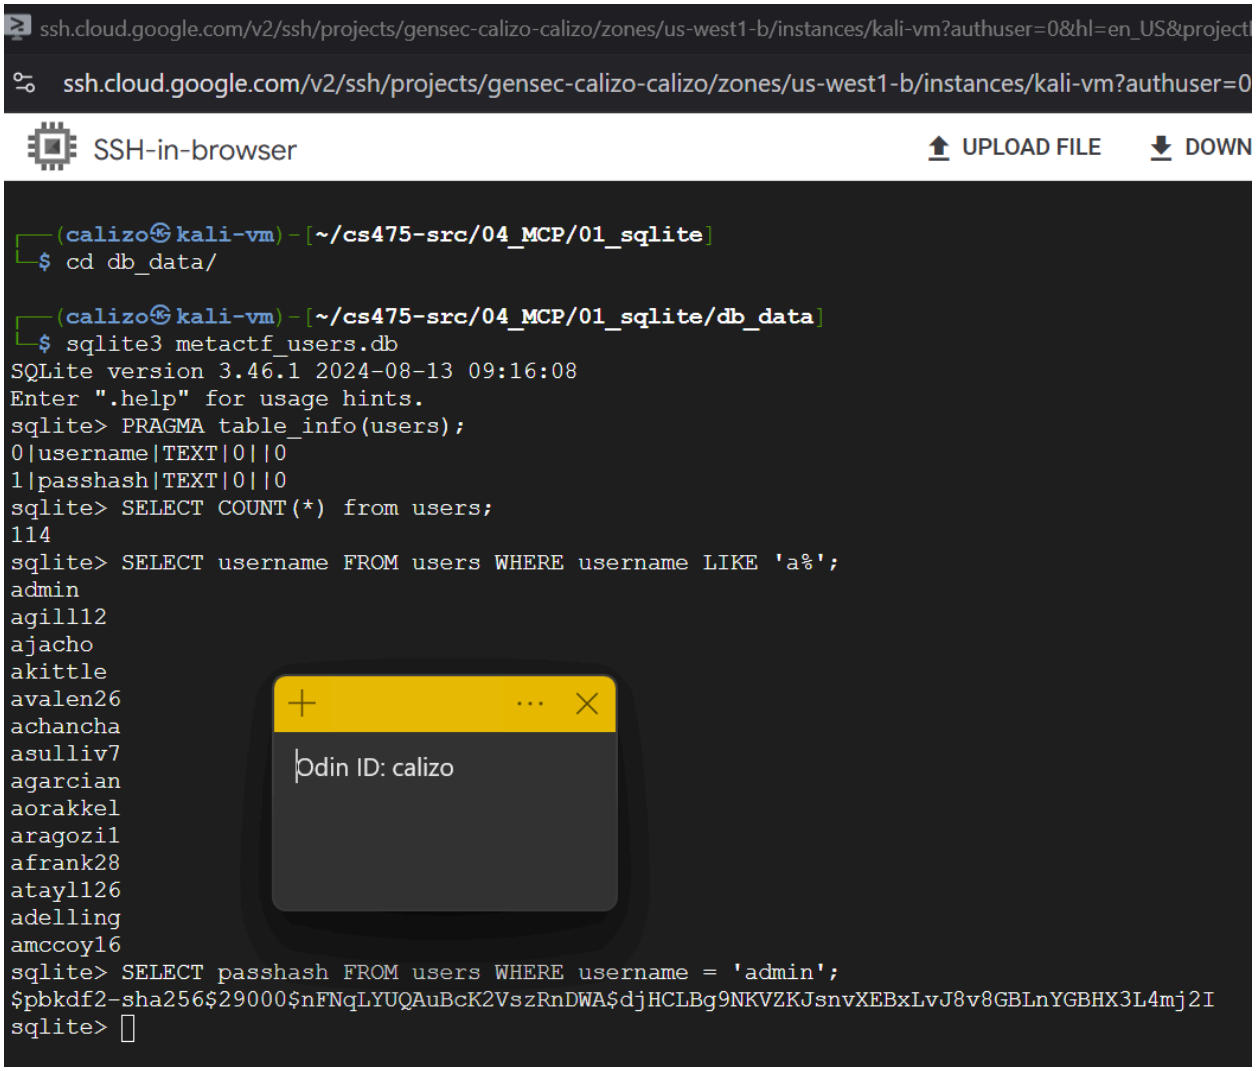

Table of Contents

Lab 4.1 MCP 2
Step 3. Vulnerable SQLite STDIO MCP Server (2) 2
1. Take a screenshot showing the results that include your OdinID 2
Step 4. Vulnerable SQLite STDIO MCP Server (3) 3
1. Take a screenshot showing the correct results being produced by the agent that includes your OdinID 3
2. Take a screenshot showing the correct results being produced by the agent that includes your OdinID 3
3. Take a screenshot of the results that includes your OdinID 4
Step 5. Secure SQLite STDIO MCP Server 6
1. Take a screenshot of the results that includes your OdinID 6
Step 7. Secure SQLite HTTP MCP Server (2) 6
1. Take a screenshot of the deployed service that includes your OdinID 6
Step 8. Secure SQLite HTTP MCP Server (3) 7
1. Take a screenshot of the request including the HTTP method and User-Agent used by the MCP client to access the MCP server 7
Step 9. Native MCP agents 8
1. Take a screenshot showing the secure tools are being used includes your OdinID 8
2. Take a screenshot of the chat history showing the query the agent generated that includes your OdinID 9
3. Take a screenshot of the number of input and output tokens consumed from executing your queries that includes your OdinID 9
Step 10. Google Drive MCP Server 9
1. List the names of all of the tools supported by the Google Drive MCP server 9
Step 14. Google Drive MCP Server (5) 10
1. Take a screenshot of each successful execution that includes your OdinID 10
Step 15. Git MCP Server 11
1. Take a screenshot of the results that includes your OdinID 11
Step 16. Fetch MCP Server 11
1. How many tool calls are made? 11
2. Take a screenshot of the results that includes your OdinID 12
Step 17. Curl MCP Server 12
1. How many tool calls are made? 12
2. Take a screenshot of the results that includes your OdinID 13

Lab 4.1 MCP

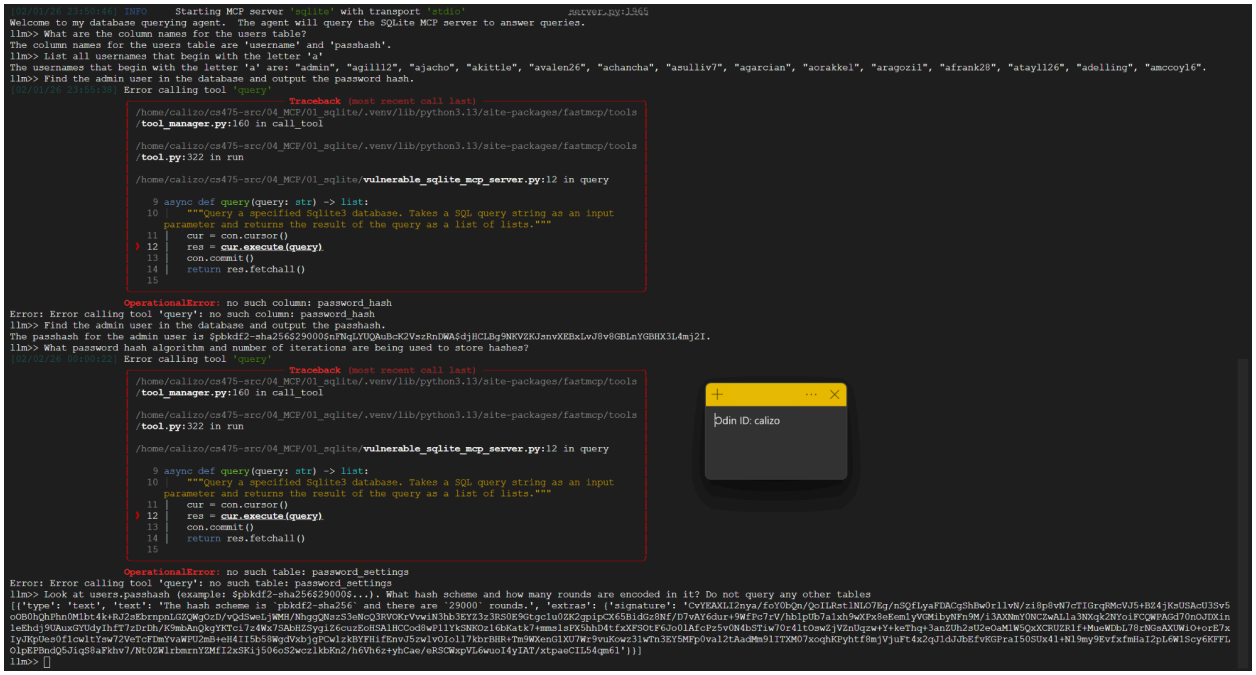

Step 3. Vulnerable SQLite STDIO MCP Server (2)

1. Take a screenshot showing the results that include your OdinID

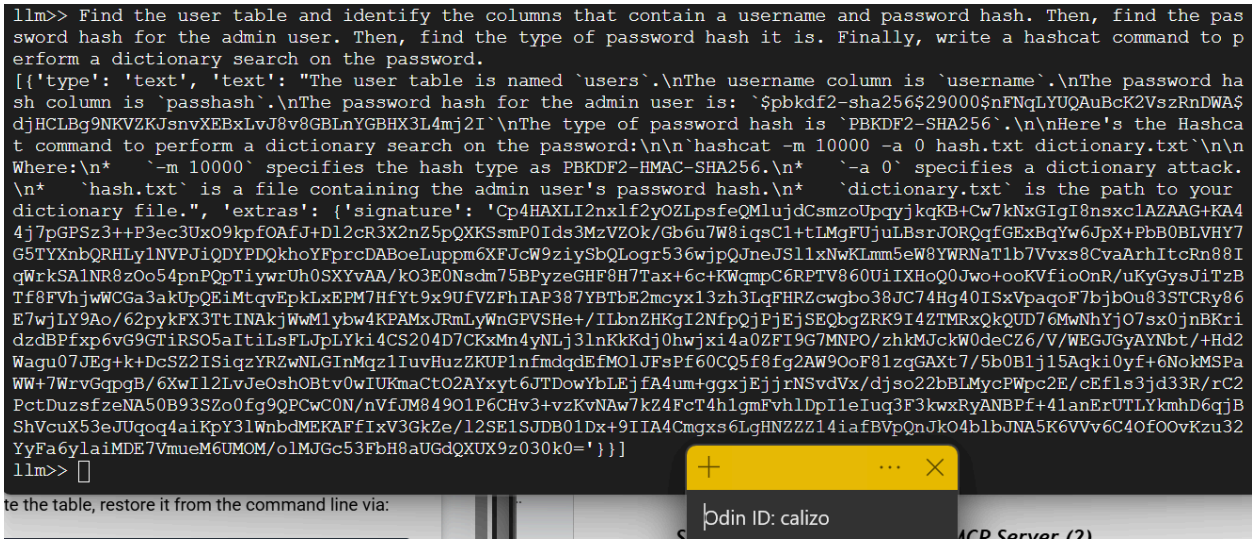

Step 4. Vulnerable SQLite STDIO MCP Server (3)

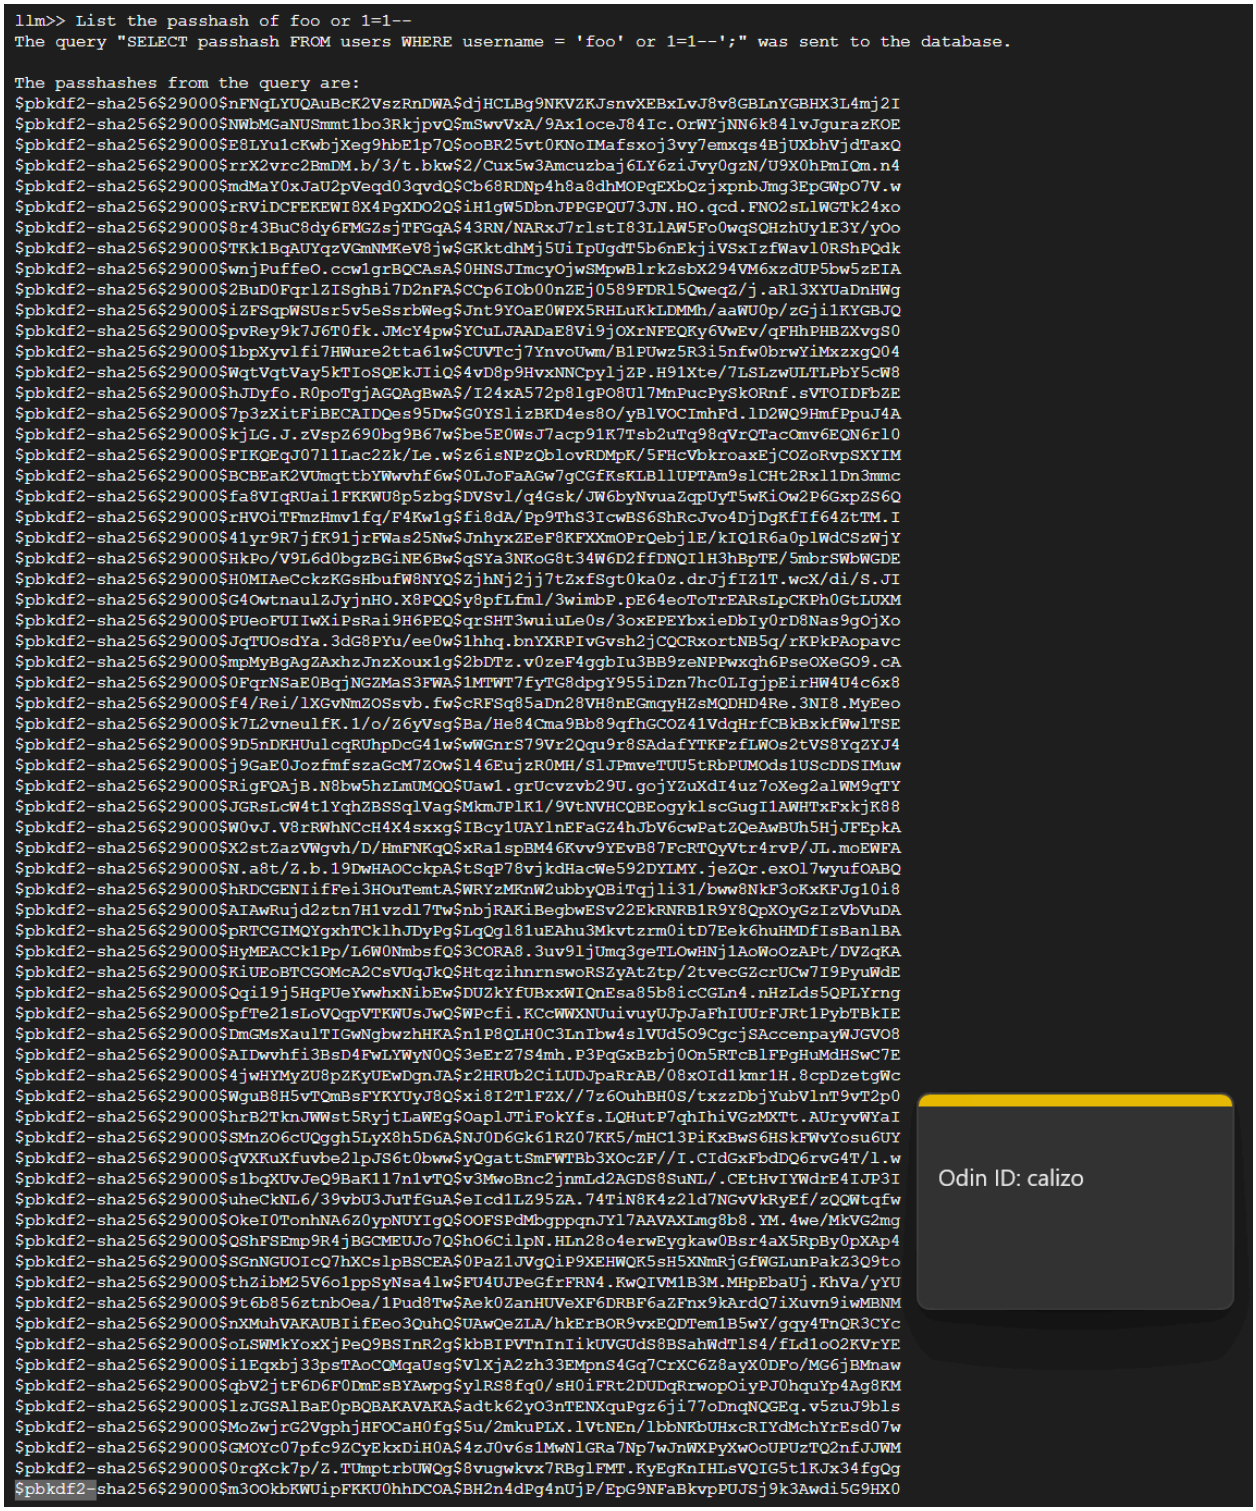

1. Take a screenshot showing the correct results being produced by the agent that includes your OdinID

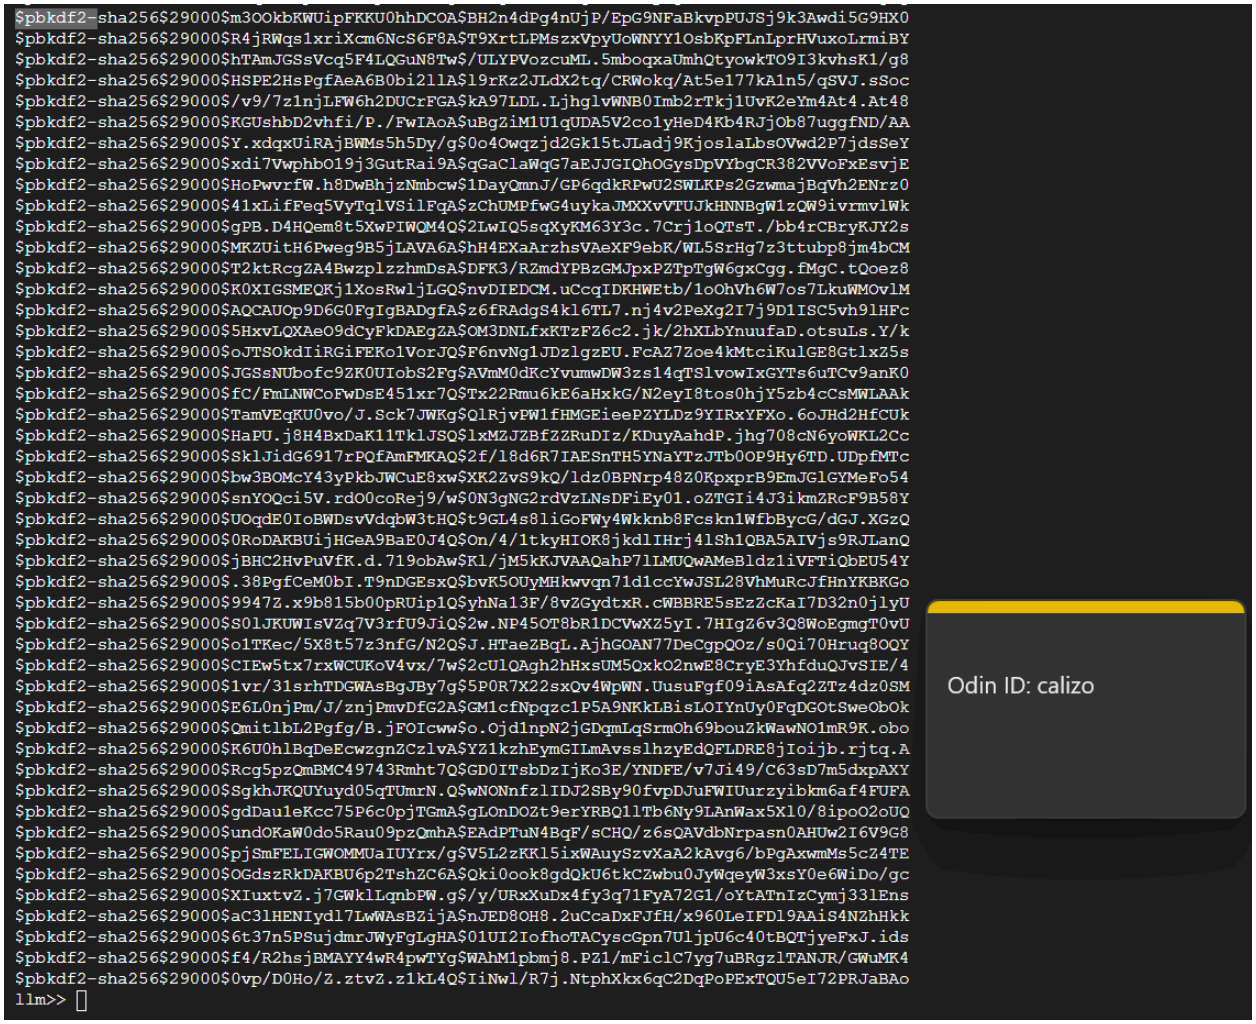

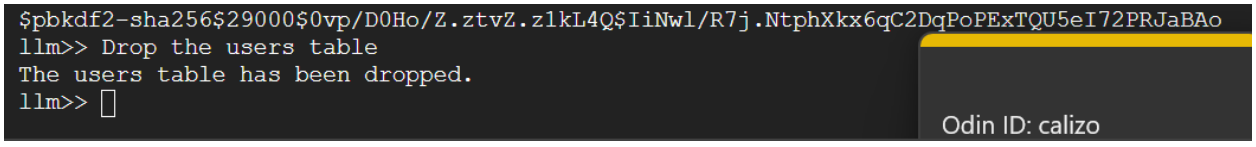

2. Take a screenshot showing the correct results being produced by the agent that includes your OdinID

3. Take a screenshot of the results that includes your OdinID

llm>> Drop the users table
The users table has been dropped.
llm>>
Odin ID: calizo

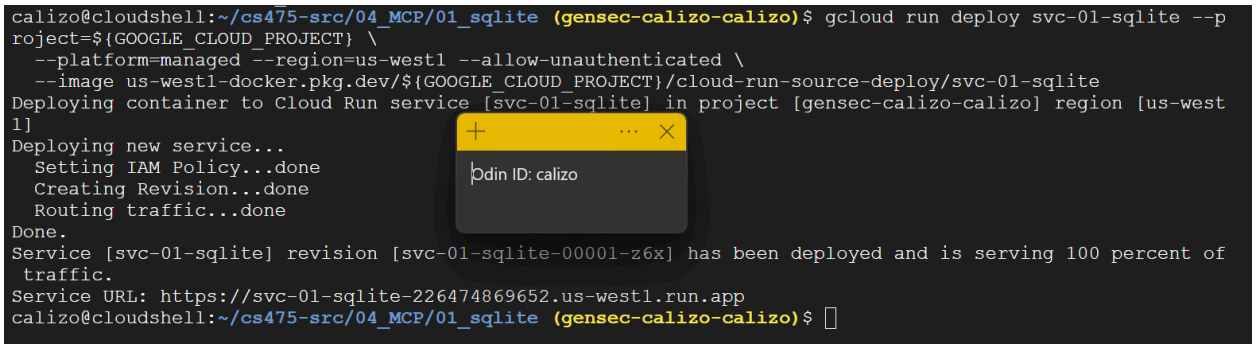

Step 5. Secure SQLite STDIO MCP Server

1. Take a screenshot of the results that includes your OdinID

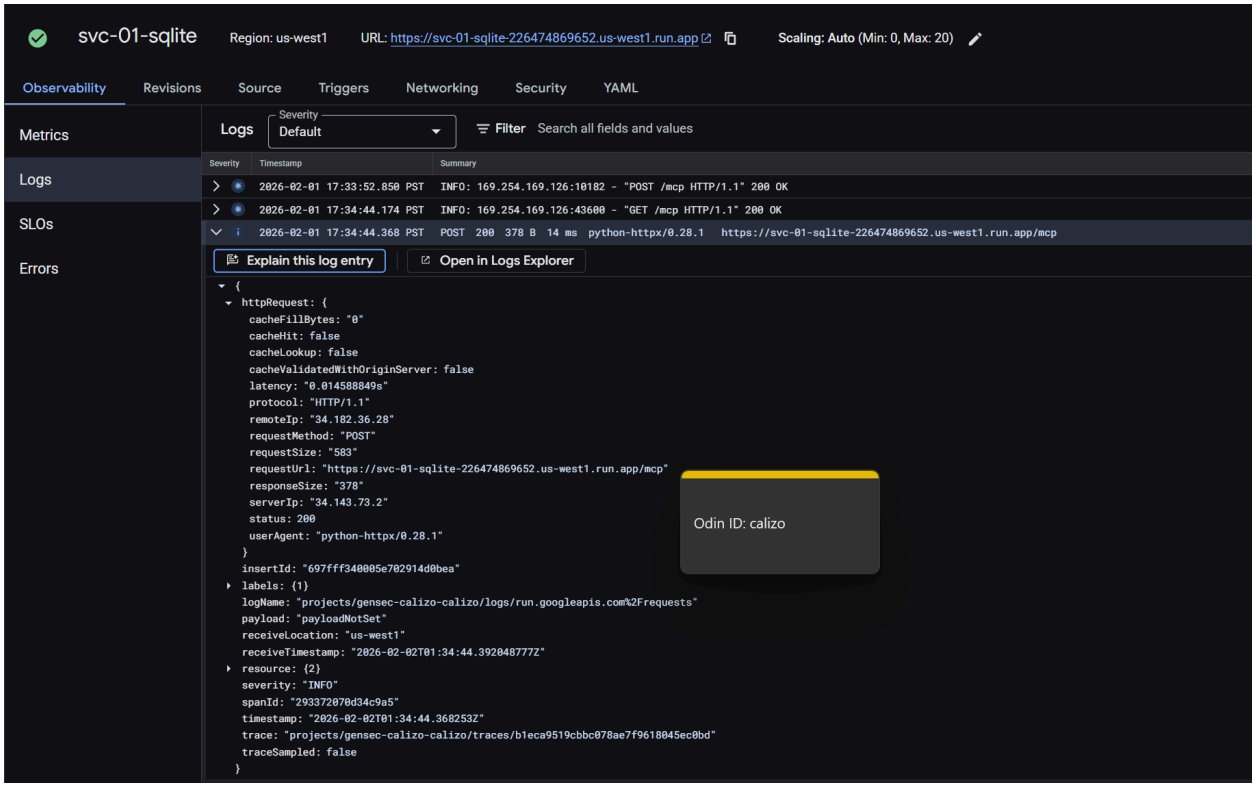

Step 7. Secure SQLite HTTP MCP Server (2)

1. Take a screenshot of the deployed service that includes your OdinID

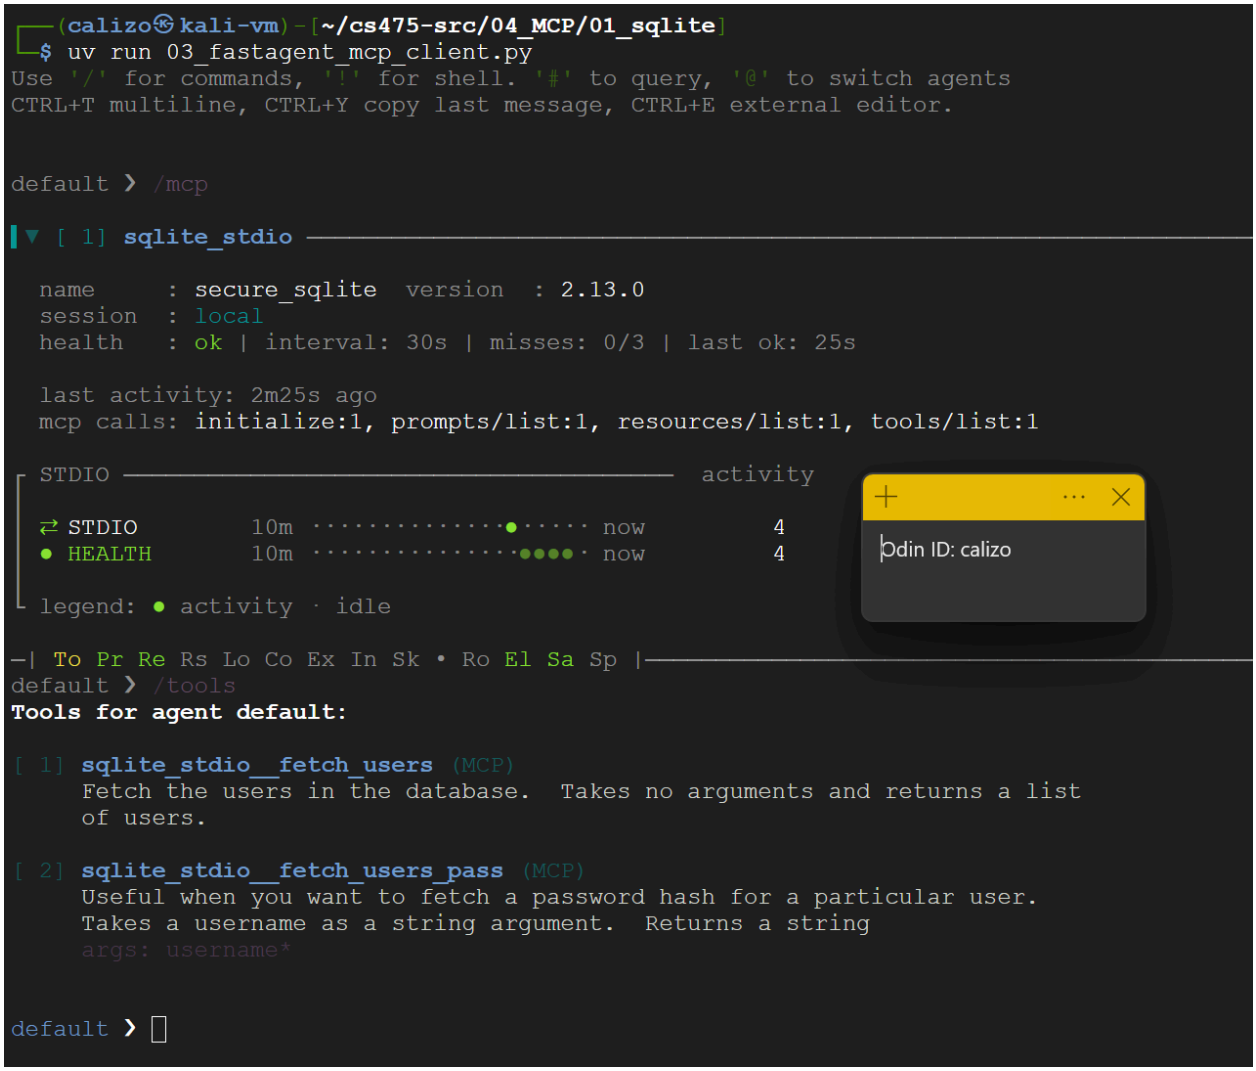

Step 8. Secure SQLite HTTP MCP Server (3)

1. Take a screenshot of the request including the HTTP method and User-Agent used by the MCP client to access the MCP server

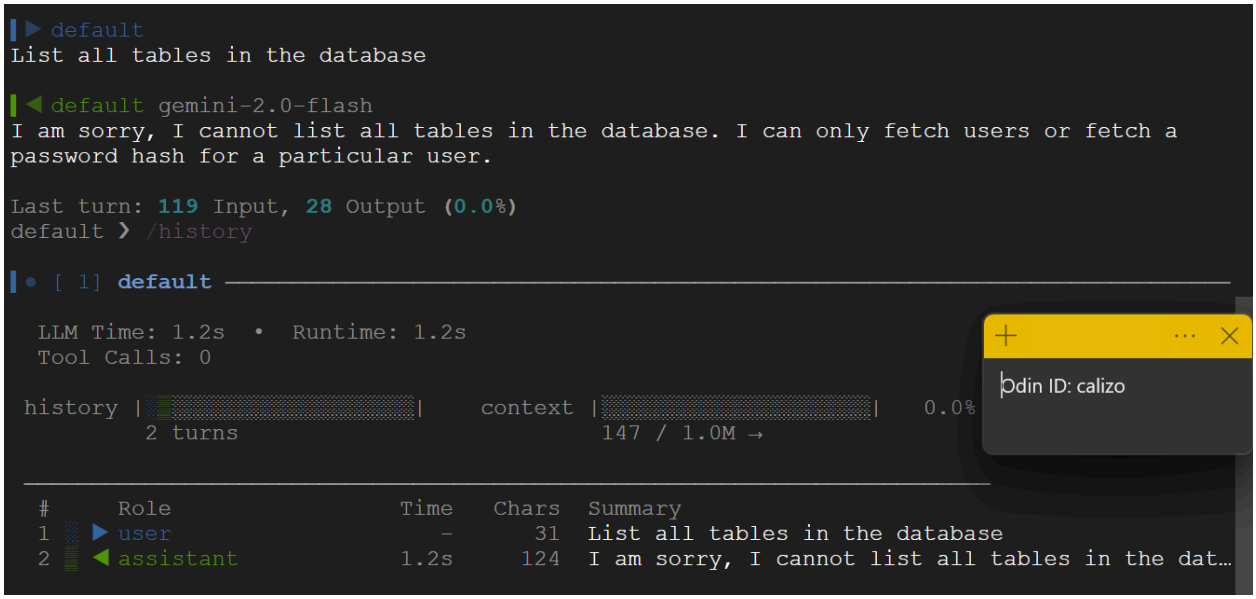

Step 9. Native MCP agents

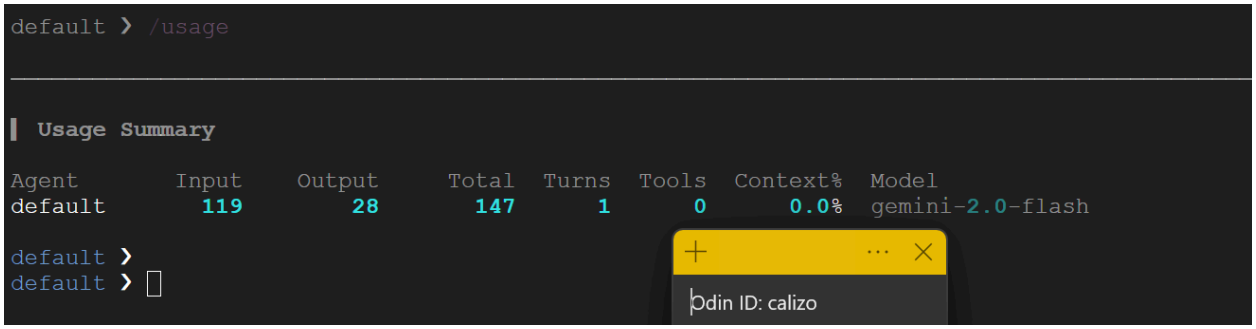

1. Take a screenshot showing the secure tools are being used includes your OdinID

2. Take a screenshot of the chat history showing the query the agent generated that includes your OdinID

3. Take a screenshot of the number of input and output tokens consumed from executing your queries that includes your OdinID

Step 10. Google Drive MCP Server

1. List the names of all of the tools supported by the Google Drive MCP server

6:@mcp.tool("list_files")
22:@mcp.tool("get_file")
35:@mcp.tool("rename_file")
48:@mcp.tool("delete_file")
61:@mcp.tool("create_folder")

```
┌──(calizo㉿kali-vm)-[~/cs475-src/04_MCP/02_google_drive]
└─$ grep -n "mcp.tool" -n gdrive_mcp_server.py
6:@mcp.tool("list_files")
22:@mcp.tool("get_file")
35:@mcp.tool("rename_file")
48:@mcp.tool("delete_file")
61:@mcp.tool("create_folder")

┌──(calizo㉿kali-vm)-[~/cs475-src/04_MCP/02_google_drive]
└─$ grep -n "async def" gdrive_mcp_server.py
7:async def list_files():
23:async def get_file(file_id: str):
36:async def rename_file(file_id: str, new_name: str):
49:async def delete_file(file_id: str):
62:async def create_folder(folder_name: str):

┌──(calizo㉿kali-vm)-[~/cs475-src/04_MCP/02_google_drive]
└─$
```

Odin ID: calizo

Step 14. Google Drive MCP Server (5)

1. Take a screenshot of each successful execution that includes your OdinID

```
llm>> List a Google Drive file I have
I found the following files:
CS 575 Lab Notebook - Lab 4 (ID: 11oYWTzdyj1RmkNNU-DNQezKHB15n6oyGURnKkuWciZE)
Storage (ID: 1ylT8gi6Ln7FkYbwCX4lItgPjfkypWs6BIFNcztUNFGs)
CS 584 Lab Notebook - HW 3 (ID: 1WcCFX8ekvvbwDCBEIjLWKO4hxxqxjFWRINuWBFyiq6A)

llm>> Create a folder called JarrenTest
I have created a folder called JarrenTest with ID: 1ddvTeaOPIn8Xkx8ssV-8ZjYeePGi-ZMD.
llm>>
```

Odin ID: calizo

Step 15. Git MCP Server

1. Take a screenshot of the results that includes your OdinID

Step 16. Fetch MCP Server

1. How many tool calls are made?

3 tool calls (2 unique URLs; Duplicate call on homepage)

1. fetch__fetch → https://www.oregonctf.org/ (with raw: True)
2. fetch__fetch → https://www.oregonctf.org/css/bootstrap.min.css
3. fetch__fetch → https://www.oregonctf.org/ (with raw: True)

2. Take a screenshot of the results that includes your OdinID

Step 17. Curl MCP Server

1. How many tool calls are made?

1 tool call

1. curl__curl_request → {'options': 'https://cs492.oregonctf.org/'}

2. Take a screenshot of the results that includes your OdinID
